

Scoring rubric and technical notes

This document makes the two-axis calculation auditable. It defines the response coding, item coefficients, normalization, provisional display, facet scores, response-pattern checks, and interpretation limits.

Design status. The coefficients are a content-based first edition, not estimates fitted to a representative calibration sample. That distinction matters: the rubric is transparent and internally balanced, but the instrument should be piloted and psychometrically validated before research or high-stakes use.

1. What the axes mean

Axis	Negative pole	Positive pole	What is summarized
Economic X	Public coordination (-10)	Market coordination (+10)	Ownership, redistribution, labor rules, public provision, regulation, trade, finance, and market power.
Civic Y	Civic autonomy (-10)	Institutional authority (+10)	Expression, privacy, due process, personal autonomy, executive power, pluralism, borders, service, and security.

The poles describe preferences about coordination and power. They are not moral rankings and do not map cleanly onto a party, country, or historical ideology. A two-dimensional graph necessarily compresses issue-specific views; the twelve facet scores preserve additional detail.

2. Response coding and item contribution

Answer	Value	Effect
Strongly disagree	-2	Multiplied by the item's X and Y coefficients
Disagree	-1	Multiplied by the item's X and Y coefficients
Neutral	0	Multiplied by the item's X and Y coefficients

Answer	Value	Effect
Agree	1	Multiplied by the item's X and Y coefficients
Strongly agree	2	Multiplied by the item's X and Y coefficients

For item i , let $r(i)$ be the response value, $x(i)$ its economic coefficient, and $y(i)$ its civic coefficient. A positive coefficient means agreement moves toward the positive pole; a negative coefficient means agreement moves toward the negative pole. Disagreement reverses that direction. Neutral contributes zero.

$$\text{raw_X} = \text{sum over all items of } [r(i) * x(i)] \quad \text{raw_Y} = \text{sum over all items of } [r(i) * y(i)]$$

$$\text{final_X} = 10 * \text{raw_X} / [2 * \text{sum } |x(i)|] = 10 * \text{raw_X} / 129$$

$$\text{final_Y} = 10 * \text{raw_Y} / [2 * \text{sum } |y(i)|] = 10 * \text{raw_Y} / 128$$

Clamp only for numerical safety after normalization, not item by item. With every item answered, the theoretical range on either axis is -10 to +10. The signed coefficient sums are exactly zero on both axes, so an all-Agree, all-Disagree, or all-Neutral pattern scores at the center rather than producing a built-in directional drift.

3. Why coefficients differ

Magnitude	Role	Content rule
1.50	Anchor	A direct axis-defining principle, usually with a clear scope or an explicit tradeoff.
1.25	Standard	A direct policy principle that is central to a facet.
1.00	Supporting	A narrower, more context-sensitive, or more institution-specific indicator.
0.25 to 0.75	Secondary loading	A smaller contribution when an item plausibly spans both economic coordination and civic power.

These values encode transparent content judgments; they do not claim empirical discrimination parameters. A future calibrated edition should estimate item behavior from data and publish any changed coefficients as a new version.

4. Provisional point shown during the test

The optional live point uses only answered items and shrinks an early estimate toward the center so that one or two answers do not appear artificially decisive. For each axis, let A be the sum of absolute coefficients among answered items and T be the total coefficient mass (64.5 for X, 64.0 for Y).

$$\text{answered_estimate} = 10 * \text{raw_answered} / (2 * A) \quad \text{provisional_display} = \text{answered_estimate} * \sqrt{A / T}$$

At full completion A equals T , so the provisional formula becomes the final formula exactly.

5. Facet scores and response-pattern checks

Code	Facet	Axis	Negative label	Positive label
E1	Ownership and enterprise	X	Public or shared ownership	Private ownership
E2	Tax and redistribution	X	Redistribution	Retention and incentives
E3	Labor and the workplace	X	Collective protections	Contract flexibility
E4	Public services and insurance	X	Universal provision	Individual provision
E5	Regulation and market rules	X	Protective regulation	Market discretion
E6	Trade, finance, and market power	X	Public direction	Market allocation
A1	Expression and association	Y	Expression and association	Social-order limits
A2	Privacy, policing, and due process	Y	Privacy and due process	Enforcement discretion
A3	Personal and family autonomy	Y	Personal autonomy	Common rules
A4	Constitutional and executive power	Y	Checks and constraints	Executive latitude
A5	Participation and pluralism	Y	Decentralized pluralism	Uniform governance
A6	Borders, service, and security	Y	Individual safeguards	Security authority

A facet score applies the same -10 to +10 normalization using only that facet's primary-axis coefficients. Cross-axis items contribute to the final graph but are not reported as a thirteenth facet.

Cross-item coherence. Twelve deliberately opposed item pairs are oriented in the same direction, and their absolute response gaps are averaged: $\text{coherence} = 100 * [1 - \text{mean}(\text{gap}) / 4]$. The app also flags a pattern when more than 85% of responses use one category. These are review prompts, not lie detectors or reliability coefficients; issue-by-issue nuance can lower coherence legitimately.

6. Reading the graph

Absolute coordinate	Descriptive wording
0.00 to 1.24	Near the midpoint / mixed
1.25 to 3.99	Mild lean
4.00 to 6.99	Clear lean
7.00 to 10.00	Strong lean

The bands are descriptive interface language, not population percentiles. Do not interpret a two-point difference as statistically meaningful without validation data and an estimated standard error. Scores should always be reported with the axis labels, version number, and the statement that this edition is unnormed.

7. Worked example

Suppose a respondent selects Agree ($r = +1$) on an item with $x = -1.50$ and $y = 0.00$. That item contributes -1.50 to raw X and 0.00 to raw Y. If the respondent instead selects Strongly disagree ($r = -2$), the same item contributes $+3.00$ to raw X. After all 101 item contributions are added, divide raw X by 129 and multiply by 10; divide raw Y by 128 and multiply by 10.

8. Quality controls and limitations

- Each item states one main proposition and avoids naming parties, politicians, or preferred ideological conclusions.
- Agreement is keyed in both directions, and total signed coefficient mass is exactly balanced on each axis.
- Several items state a tradeoff or limiting condition so agreement does not merely reward an attractive abstract value.
- The item order interleaves topics and wording directions to reduce obvious response patterns and local priming.
- The five-point scale is symmetric and fully labeled. Neutral is available and scores zero.
- This edition has not been field-tested for factor structure, test-retest stability, measurement invariance, differential item functioning, or predictive validity.
- Jurisdiction, current events, translation, and policy knowledge can change how an item is understood. A two-axis result cannot capture every political value.

9. Recommended validation before research use

1. Conduct cognitive interviews across ideological, educational, age, and cultural groups; revise items that are interpreted inconsistently.

2. Pilot on a diverse sample large enough for item analysis, exploratory factor analysis, and a held-out confirmatory factor analysis.
3. Examine response distributions, item-total relationships, local dependence, and cross-loadings; preregister any removal or reweighting rules.
4. Test measurement invariance and differential item functioning across relevant groups, languages, countries, and survey modes.
5. Estimate test-retest stability and uncertainty intervals. Publish norms only from a well-described target population and sampling design.
6. Preserve this v1.0 key for reproducibility; release empirical changes under a new version with a crosswalk.

Complete item scoring key

X: negative = public coordination; positive = market coordination. Y: negative = civic autonomy; positive = institutional authority. Multiply the selected response value by each listed coefficient.

ID	Key	Facet	Statement	X	Y	Tier
Q001	E1a	E1 Ownership and enterprise	Essential network utilities, such as water or electricity, should usually be publicly owned.	-1.50	0.00	Anchor
Q002	A1a	A1 Expression and association	Government should not punish peaceful speech merely because many people find it offensive.	0.00	-1.50	Anchor
Q003	E2a	E2 Tax and redistribution	Higher-income households should pay a larger percentage of their income in taxes than middle-income households.	-1.50	0.00	Anchor
Q004	A2a	A2 Privacy, policing, and due process	Except in an immediate danger, police should need a judicial warrant to access a person's private digital messages.	0.00	-1.50	Anchor
Q005	E3a	E3 Labor and the workplace	Employees should be able to form a union without interference from their employer.	-1.25	0.00	Standard
Q006	A3a	A3 Personal and family autonomy	Adults should generally be free to make personal choices unless those choices directly harm another person.	0.00	-1.50	Anchor
Q007	E4a	E4 Public services and insurance	A universal public health-insurance plan should guarantee a core package of care to everyone.	-1.50	0.00	Anchor
Q008	A4a	A4 Constitutional and executive power	An executive leader should need legislative authorization to continue emergency powers beyond a short initial period.	0.00	-1.50	Anchor
Q009	E5a	E5 Regulation and market rules	Environmental rules should require firms to bear measurable costs that their activity imposes on the public.	-1.25	0.00	Standard
Q010	A5a	A5 Participation and pluralism	Public decisions should be made at the lowest level of government that can manage their consequences.	0.00	-1.25	Standard
Q011	E6a	E6 Trade, finance, and market power	Free-trade agreements should generally be favored even when some domestic industries become smaller.	+1.25	0.00	Standard
Q012	A6a	A6 Borders, service, and security	Government should need prompt judicial review before placing a citizen under a security-based travel restriction.	0.00	-1.25	Standard
Q013	E3b	E3 Labor and the workplace	Employers and individual workers should generally be free to negotiate terms without sector-wide bargaining requirements.	+1.25	0.00	Standard

ID	Key	Facet	Statement	X	Y	Tier
Q014	A2b	A2 Privacy, policing, and due process	Broad monitoring of public communications is acceptable for preventing terrorism when a secret court provides oversight.	0.00	+1.25	Standard
Q015	E2b	E2 Tax and redistribution	Taxes should be low and broadly uniform even if this results in less redistribution.	+1.50	0.00	Anchor
Q016	A1b	A1 Expression and association	Speech that seriously undermines social cohesion may be restricted even when it does not directly threaten violence.	0.00	+1.50	Anchor
Q017	E1b	E1 Ownership and enterprise	Privately owned firms should remain the normal form of ownership in most industries where meaningful competition is possible.	+1.50	0.00	Anchor
Q018	X1	X Cross-axis institutions	An employer should be barred from firing a worker for lawful political activity outside work unless the activity materially affects the job.	-0.50	-1.00	Cross-axis
Q019	A6b	A6 Borders, service, and security	Citizenship may be revoked from a dual national who is convicted of a serious terrorism offense.	0.00	+1.25	Standard
Q020	E6b	E6 Trade, finance, and market power	Government should favor domestic suppliers in order to preserve industries it considers strategically important.	-1.00	+0.25	Supporting
Q021	A5b	A5 Participation and pluralism	National government should be able to override local rules in order to maintain uniform standards across the country.	0.00	+1.25	Standard
Q022	E5b	E5 Regulation and market rules	When either approach can meet the same environmental target, pricing pollution is preferable to prescribing production methods.	+1.00	0.00	Supporting
Q023	A4b	A4 Constitutional and executive power	During a prolonged crisis, decisive executive action can be more important than obtaining advance legislative approval.	0.00	+1.50	Anchor
Q024	E4b	E4 Public services and insurance	Competition among private insurers should be the main organizing principle for health coverage.	+1.50	0.00	Anchor
Q025	A3b	A3 Personal and family autonomy	Government may restrict adult conduct judged seriously immoral even when direct harm to another person has not been shown.	0.00	+1.50	Anchor
Q026	E6c	E6 Trade, finance, and market power	Capital gains should be taxed at a lower rate than wages in order to encourage investment.	+1.25	0.00	Standard
Q027	A6c	A6 Borders, service, and security	Military service should remain voluntary except when the country faces a direct threat to its survival.	0.00	-1.25	Standard
Q028	E1c	E1 Ownership and enterprise	Employee-owned enterprises should receive limited tax advantages over otherwise similar investor-owned firms.	-1.00	0.00	Supporting
Q029	A1c	A1 Expression and association	People should be allowed to publish political arguments anonymously.	0.00	-1.25	Standard

ID	Key	Facet	Statement	X	Y	Tier
Q030	E2c	E2 Tax and redistribution	A tax on very large inheritances is a legitimate way to limit the concentration of wealth across generations.	-1.25	0.00	Standard
Q031	A2c	A2 Privacy, policing, and due process	Evidence obtained through a serious illegal search should generally be excluded from a criminal trial even when it indicates guilt.	0.00	-1.25	Standard
Q032	E3c	E3 Labor and the workplace	A statutory minimum wage should be high enough to support a basic standard of living even if some low-wage jobs disappear.	-1.50	0.00	Anchor
Q033	A3c	A3 Personal and family autonomy	Same-sex couples should have the same access to civil marriage as opposite-sex couples.	0.00	-1.25	Standard
Q034	E4c	E4 Public services and insurance	Public funding for primary and secondary education should be used to reduce large quality gaps between neighborhoods.	-1.25	0.00	Standard
Q035	A4c	A4 Constitutional and executive power	Courts should be able to invalidate laws that violate constitutional rights even when those laws were approved by an elected majority.	0.00	-1.25	Standard
Q036	E5c	E5 Regulation and market rules	Regulators may restrict a new product when credible evidence points to severe harm even though uncertainty remains.	-1.00	+0.25	Supporting
Q037	X2	X Cross-axis institutions	A dominant digital platform should be required to give users a clear appeal process when it removes political speech.	-0.75	-0.75	Cross-axis
Q038	A5c	A5 Participation and pluralism	Citizens should be able to place a proposal on a binding referendum after meeting a substantial signature requirement.	0.00	-1.00	Supporting
Q039	E2d	E2 Tax and redistribution	People should generally be free to transfer accumulated wealth to their heirs without a special inheritance tax.	+1.25	0.00	Standard
Q040	A1d	A1 Expression and association	Organizers of large public demonstrations should need prior government permission rather than merely give notice.	0.00	+1.25	Standard
Q041	E1d	E1 Ownership and enterprise	Government should be allowed to create a public enterprise when a private market repeatedly fails to provide an essential service.	-1.25	0.00	Standard
Q042	A6d	A6 Borders, service, and security	Most young adults should be required to complete a period of military or civilian national service.	0.00	+1.25	Standard
Q043	E6d	E6 Trade, finance, and market power	A public development bank should finance socially useful projects that private investors consider too risky.	-1.25	0.00	Standard
Q044	A5d	A5 Participation and pluralism	Elected representatives should make final policy choices rather than rely frequently on referendums.	0.00	+1.00	Supporting
Q045	E5d	E5 Regulation and market rules	Firms should be free to sell a legal product unless regulators can demonstrate that it is likely to cause significant harm.	+1.25	-0.25	Standard

ID	Key	Facet	Statement	X	Y	Tier
Q046	A4d	A4 Constitutional and executive power	Except where constitutional text is explicit, elected majorities should be able to implement policy without judges overturning it.	0.00	+1.25	Standard
Q047	E4d	E4 Public services and insurance	Families should be able to direct public education funding to an approved private school of their choice.	+1.00	-0.25	Supporting
Q048	A3d	A3 Personal and family autonomy	A court should be able to authorize lifesaving treatment for a competent adult who refuses it when death is otherwise imminent.	0.00	+1.25	Standard
Q049	E3d	E3 Labor and the workplace	Legal wage floors should mainly reflect local labor-market conditions rather than a uniform national standard.	+1.00	0.00	Supporting
Q050	A2d	A2 Privacy, policing, and due process	Courts should give police wider discretion over searches when officials can show a substantial public-safety risk.	0.00	+1.25	Standard
Q051	E5e	E5 Regulation and market rules	Consumer-protection rules should standardize important contract terms even when this limits the variety of products offered.	-1.00	0.00	Supporting
Q052	A5e	A5 Participation and pluralism	Minor political parties should receive legislative representation roughly in proportion to their share of the vote.	0.00	-1.00	Supporting
Q053	E6e	E6 Trade, finance, and market power	Private banks should allocate most business credit without government targets for particular industries.	+1.25	0.00	Standard
Q054	A6e	A6 Borders, service, and security	Each asylum claim should receive an individualized hearing even when the number of arrivals is unusually high.	0.00	-1.25	Standard
Q055	E1e	E1 Ownership and enterprise	Subject to contracts and general law, profitable firms should decide for themselves how to divide earnings among owners, workers, and reinvestment.	+1.25	0.00	Standard
Q056	X3	X Cross-axis institutions	During a declared national emergency, government may direct private production of essential goods for a limited period subject to legislative renewal.	-1.00	+1.50	Cross-axis
Q057	A1e	A1 Expression and association	A peaceful organization should not be banned solely because it rejects the existing constitutional order.	0.00	-1.25	Standard
Q058	E2e	E2 Tax and redistribution	Government should guarantee every adult a minimum income floor, even if doing so requires higher taxes.	-1.50	0.00	Anchor
Q059	A2e	A2 Privacy, policing, and due process	A person in police custody should have access to a lawyer before substantive questioning begins.	0.00	-1.00	Supporting
Q060	E3e	E3 Labor and the workplace	Workers should elect representatives to the boards of large companies.	-1.25	0.00	Standard
Q061	A3e	A3 Personal and family autonomy	During a serious outbreak of a contagious disease, government may require vaccination for access to crowded public settings.	0.00	+1.00	Supporting

ID	Key	Facet	Statement	X	Y	Tier
Q062	E4e	E4 Public services and insurance	A public pension should guarantee a basic retirement benefit that does not depend on financial-market performance.	-1.25	0.00	Standard
Q063	A4e	A4 Constitutional and executive power	Election administration should be institutionally independent from the government currently in office.	0.00	-1.00	Supporting
Q064	E1f	E1 Ownership and enterprise	When a competitive private market can provide the same service, government should generally sell businesses it owns.	+1.25	0.00	Standard
Q065	A6f	A6 Borders, service, and security	Government may detain people who cross a border without authorization while their identities and legal claims are resolved.	0.00	+1.00	Supporting
Q066	E6f	E6 Trade, finance, and market power	Vacant urban land held mainly for speculation should face higher taxes than land in active use.	-1.00	0.00	Supporting
Q067	A5f	A5 Participation and pluralism	Electoral rules should favor stable governing majorities even when small parties receive fewer seats than their vote share would imply.	0.00	+1.00	Supporting
Q068	E5f	E5 Regulation and market rules	Well-informed adults should be able to accept greater financial risk in exchange for fewer regulatory protections.	+1.25	-0.25	Standard
Q069	A4f	A4 Constitutional and executive power	Voting in national elections should be compulsory, with a modest penalty for unjustified nonparticipation.	0.00	+1.00	Supporting
Q070	E4f	E4 Public services and insurance	Retirement saving should rely mainly on accounts owned and invested by individuals.	+1.50	0.00	Anchor
Q071	A3f	A3 Personal and family autonomy	Parents should have broad discretion over a child's education provided that minimum academic standards are met.	+0.25	-1.00	Supporting
Q072	E3f	E3 Labor and the workplace	After a lawful strike has continued for a reasonable period, a firm should be allowed to hire permanent replacement workers.	+1.25	0.00	Standard
Q073	A2f	A2 Privacy, policing, and due process	A court should be able to impose preventive restrictions after a sentence ends when a repeat serious offender is judged highly dangerous.	0.00	+1.25	Standard
Q074	E2f	E2 Tax and redistribution	Public income support should be tightly targeted to people who cannot meet basic needs rather than offered broadly.	+1.00	0.00	Supporting
Q075	X4	X Cross-axis institutions	A private employer should generally be free to enforce a workplace dress code even when an employee objects on religious grounds.	+1.00	+0.75	Cross-axis
Q076	A1f	A1 Expression and association	Government may prohibit an organization that advocates replacing democracy even when the group is not planning violence.	0.00	+1.25	Standard
Q077	E4g	E4 Public services and insurance	Unemployment benefits should replace a meaningful share of lost wages even if that requires higher payroll taxes.	-1.25	0.00	Standard

ID	Key	Facet	Statement	X	Y	Tier
Q078	A4g	A4 Constitutional and executive power	Legislative oversight bodies should have access to national-security operations even when some details must remain confidential.	0.00	-1.25	Standard
Q079	E5g	E5 Regulation and market rules	During a severe shortage, public agencies should be able to set temporary maximum prices for essential goods.	-1.25	+0.25	Standard
Q080	A5g	A5 Participation and pluralism	Public institutions should accommodate minority cultural or religious practices unless doing so creates a substantial burden on others.	0.00	-1.00	Supporting
Q081	E6g	E6 Trade, finance, and market power	On a new lease, a landlord should generally be free to set rent according to market demand.	+1.25	0.00	Standard
Q082	A6g	A6 Borders, service, and security	A person who reveals an unlawful national-security program should be allowed to raise a public-interest defense in court.	0.00	-1.00	Supporting
Q083	E1g	E1 Ownership and enterprise	A high concentration of private ownership can justify public intervention even when current consumer prices are low.	-1.25	0.00	Standard
Q084	A1g	A1 Expression and association	Journalists should be legally free to publish classified information of public importance unless a court finds a specific and serious risk of harm.	0.00	-1.25	Standard
Q085	E2g	E2 Tax and redistribution	Reducing large differences in disposable income is a legitimate goal of tax policy, even when basic needs are already met.	-1.25	0.00	Standard
Q086	A2g	A2 Privacy, policing, and due process	A low-risk defendant should not remain in jail before trial solely because the defendant cannot afford cash bail.	-0.25	-1.00	Supporting
Q087	E3g	E3 Labor and the workplace	Contract workers who depend economically on one platform should receive protections similar to those of employees.	-1.25	0.00	Standard
Q088	A3g	A3 Personal and family autonomy	All schools should be required to teach a common civic curriculum in addition to basic academic subjects.	0.00	+1.00	Supporting
Q089	E6h	E6 Trade, finance, and market power	A dominant firm should be broken up when its market power persistently blocks new competitors, even if its prices remain low.	-1.00	0.00	Supporting
Q090	A5h	A5 Participation and pluralism	National institutions should apply uniform rules rather than create separate accommodations for cultural or religious groups.	0.00	+1.00	Supporting
Q091	E5h	E5 Regulation and market rules	During a shortage, prices should generally be allowed to rise unless there is evidence of collusion or deception.	+1.50	0.00	Anchor
Q092	A4h	A4 Constitutional and executive power	An elected executive should be able to dismiss senior civil servants in order to carry out its policy program.	0.00	+1.25	Standard
Q093	E4h	E4 Public services and insurance	Adults should normally purchase non-emergency services themselves rather than receive them through universal public programs.	+1.25	0.00	Standard

ID	Key	Facet	Statement	X	Y	Tier
Q094	X5	X Cross-axis institutions	A local government should be free to suspend a national business regulation it considers unnecessary when the effects remain within its borders.	+0.50	-0.50	Cross-axis
Q095	A3h	A3 Personal and family autonomy	Possession of a small amount of a recreational drug for personal use should be handled as a health or civil matter rather than a crime.	0.00	-1.25	Standard
Q096	E3h	E3 Labor and the workplace	Rules on overtime should usually be left to contracts unless a clear health or safety risk is involved.	+1.25	0.00	Standard
Q097	A2h	A2 Privacy, policing, and due process	When rehabilitation and secure confinement conflict, prisons should give greater priority to confinement.	0.00	+1.25	Standard
Q098	E2h	E2 Tax and redistribution	The tax system should prioritize incentives for investment over reducing differences in after-tax income.	+1.50	0.00	Anchor
Q099	A1h	A1 Expression and association	An elected government should be able to set the editorial priorities of publicly funded broadcasters.	0.00	+1.25	Standard
Q100	E1h	E1 Ownership and enterprise	The prospect of unequal ownership is an acceptable consequence of allowing people to invest and build businesses.	+1.25	0.00	Standard
Q101	A6h	A6 Borders, service, and security	A security agency should be allowed to withhold some operational programs from legislative committees when disclosure could compromise them.	0.00	+1.25	Standard
